

QDialog

BankDataBase

Show

```
graph BT; Show --> QDialog; Show --> BankDataBase;
```

The diagram illustrates a class hierarchy or association. At the bottom is a box labeled 'Show'. Two arrows originate from the top of the 'Show' box and point upwards to the bottom of two boxes above it: 'QDialog' on the left and 'BankDataBase' on the right. This suggests that 'Show' is a base class or a central entity that interacts with both 'QDialog' and 'BankDataBase'.
